

Tomas Klemets, Head of Scheduling Safety, Jeppeson Systems AB

Since the late 1990's, Tomas Klemets specialized in airline crew management and has worked with a large number of airline operators helping them find the optimal blend of crew productivity, cost savings, quality of life, and flight safety.

He is heading the crew scheduling safety work at Jeppesen and has presented results and findings at a large number of different safety conferences as well as in safety journals.

Tomas is one of the key innovators behind FRM services and products such as CrewAlert, the Boeing Alertness Model, Jeppesen Concert and crew pairing and rostering optimisation using bio-mathematical fatigue models.
