

Sally Longstaff, Safety Analyst, Group Safety, Emirates Airline

Sally Longstaff is an aviation safety management specialist with a background of designing, implementing, running and developing Safety Management Systems, in different and complex organisations. These include a military operational readiness training organisation, a calibration and flight inspection organisation and currently a major airline based in the Middle East. She has a strong background in safety data analysis and occurrence management.

Sally has a Masters degree in Aeronautical Engineering and has been flying and working in aviation in one form or another for 17 years. She began her career in aviation as a Systems Test Engineer on ejection seats and followed that with a 2-year graduate program with a large UK aerospace manufacturer and operator, before moving into operational experience and safety management.
