

Péricles Maranhão Neto, Acting Manager of the Safety Data and Analysis team, JetBlue Airways.

Péricles has worked at JetBlue since 2009, first as an Air Safety Investigator and later as the team leader of the Safety Data and Analysis team. Under his leadership, the Safety Data and Analysis team supports all safety-related data collection, management, reporting, and analysis functions.

Over the last eight years, Péricles has participated in projects to create a standard root cause analysis taxonomy at JetBlue, a confidential employee hazard reporting system, JetBlue's Safety Risk Management system, built up robust safety data collection and reporting systems, and most recently implemented a continuous flight and reporting data monitoring and analysis program in the Safety Department.

Péricles holds a Masters of Business Administration in Aviation from Embry-Riddle Aeronautical University and a Commercial Pilot's License from the U.S. Federal Aviation Administration.
