

**Paulo Razaboni, Manager, Air Safety Department, South American Region, Embraer**

Paulo is a graduate in Electronic Engineering with a specialization degree in Air Safety, Production Management and Administration. He is accredited with the Aeronautical Accidents Prevention and Investigation System (SIPAER – Brazil).

After joining EMBRAER in the technical support area, he moved to the Air Safety Department where he leads a team responsible for analyzing flight data and implementing the Safety Management System. In addition he coordinates operators safety meetings, generates safety-related statistics for the fleet and supports the development of specifications for flight data recorders.

He also developed specific software for animation named ‘Flyback’ that is used for events investigation and training, amongst other uses.
