

Dr. Jeffrey Schroeder, Chief Scientist for Flight Simulation Systems, FAA

Jeff has been in his current position with the FAA' for the last 7 years and has been involved with most all of the FAA's upset prevention and recovery efforts. He also sponsors the agency's terminal area safety research.

Previously, he spent over 20 years working at NASA Ames with his last position being Chief of the Aviation Systems Division. He has produced technical publications in flight dynamics, handling qualities, and flight simulation.

Jeff has a Ph.D. from Stanford and an M.S. and B.S. from Purdue, all in Aeronautics and Astronautics.

He is Fellow of the Royal Aeronautical Society and an Associate Fellow of the American Institute of Aeronautics and Astronautics.
