

Captain Hari Shankar, Singapore Airlines

Hari joined the aviation industry in 1996 as a cadet and has over 10000 hours of flying experience. His first type rating was on the Boeing B737 and has since been on the A320 for the past 16 years.

Joined the SQ CRM cohort in 2005 and has contributed to the program/syllabus development for the group since.

His passion for teaching made him join the training fraternity in 2006, conducting instructor training, standardization and audits. He is a qualified TRE/TRI with over 2000 simulator hours. Hari has the keen ability to 'connect to dots' and has developed new programs that are custom-made for the organization and his works have benefitted not just the pilots but also the cabin

crew, ground staff and overseas managers within the company.

Currently holding a 'Safety and Human factors' portfolio, Hari has shared his views and solutions to many industry issues at several forums, which has been well-received. Hari has a very unique style of presentation that has always captured the audiences' attention. Hari also holds a 'Bachelor of Science' degree from the National University of Singapore.
