

Exhibitor BOOTH 4

Flight Data Services provide Flight Data Analysis incorporating Flight Data Monitoring (FDM) and Flight Operations Quality Assurance (FOQA) as a service to aircraft operators worldwide. Our safety centres in the UK, USA and Singapore offer 24-hour time zone coverage, ensuring an enhanced service, with dedicated regional resources. Our fully outsourced service, Flight Data Connect, uses a powerful web-based platform supporting over 130 operators, with over 1,500 aircraft and 4,000 flights per day.

We are committed to our mission to make air travel safer through the innovative use of flight data, applying our expert knowledge of aviation safety, Flight Data Analysis and information technology. Flight Data Services have collaborated with IATA to enhance the global airline data sharing initiative Flight Data Exchange (FDX) as part of their Global Aviation Data Management (GADM) program. Our combined capabilities connect the best analysis tool to more flight data across the globe.
