MER Systems is an Agile Software Company specialized in the design and development of safety, quality and security software solutions for aviation, marine and offshore/onshore drilling industry. We are member of Flight Safety Foundation, an international non-profit organization whose sole purpose is to provide impartial, independent, expert safety guidance and resources for the aviation and aerospace industry.

From the very beginning we embraced the Agile software development methodology in order to add more value to the business faster and to satisfy the customer through early and continuous delivery of reliable working software.

Modern information technologies, such as Cloud Computing, JAVA Enterprise framework, Google Web Toolkit, AJAX, Restful Web Services and the integration of several excellent and free open source products, are key factors as to why we can offer reliable, flexible and affordable compliance software solutions for companies of any size.
