The Virtual EOC

Veoci is a cloud-based suite of collaboration, management and controlled emergency response and daily operations tools designed to meet the decision and communication requirements of multiple teams at many locations. With stringent security, high availability, and scalable performance, it is designed for global deployment within complex enterprises. With United Airlines as a valued customer, using our system to plan for, respond to and communicate during any potential crisis at the click of a button, it is evident that our software is trusted to support the most critical of missions. When failure is not an option, Veoci organizes the response, and your team delivers the result.
