Aviation**Safety**Network

The Aviation Safety Network (ASN) is an independent initiative founded in 1996 to provide aviation professionals and media with reliable authoritative information on airliner accidents and safety issues.

ASN manages safety related databases with accident reports, safety recommendations, aircraft/UAS near miss incidents. The ASN Safety Database available on <https://aviation-safety.net/> contains detailed descriptions of over 21,100 accidents and hijackings involving airliners, military transport aircraft and corporate jets.
