

Safran Electronics & Defense  
Booth #8

Safran Electronics & Defense, a Safran high-tech company, holds world or European leadership positions in optronics, avionics, electronics and critical software for both civil and military markets. Since the late 1960's, the company has pioneered and has been a key supplier of on-board Flight Data Recorders (FDRs), Digital Flight Data Acquisition Unit (FDIMU / DFDAU) and Aircraft Condition Monitoring Systems (ACMS). Present today on key aircraft programs with its FDIMU/DFDAU, ACMS and QAR (A320, B737, A380, A350, ATR, Embraer, Airbus Helicopters, etc.), Safran Electronics & Defense also offers a wireless aircraft data transfer solution called WEFA. Moreover the company naturally became a Flight Data Monitoring solution supplier in the 1980's with the Analysis Ground Station (AGS) software and provides today a comprehensive suite of services for aircraft and helicopters operators called "Cassiopee" that help them comply with international requirements, improve flight safety, reduce costs, and much more.
