

**David Mangan**

Manager Safety, Quality & Compliance Support  
Qantas Engineering

David is responsible for managing the SQC Support team which provides oversight to Qantas Engineering including investigation, audit, compliance advice, NAA management and project support. The SQC group provides support to ensure compliance for all areas of Engineering including WHS.

David began his aviation career in 1992 as an apprentice aircraft maintenance engineer at Qantas. David has worked with in various Qantas Engineering areas as a maintenance engineer in Base, Line, Component & Engine Maintenance and as a Senior Quality Engineer. David also served 10 years with the Australian Army Reserve in an Artillery Battery directing and providing fire support.

David has completed a Diploma in Mechanical Engineering, a Graduate Certificate in Information Technology (Deakin University) and a Masters in Science & Technology (Airline Management) with NSW University.

Throughout his career, David has been involved in various projects including assisting with the setup of new maintenance facilities & ports, the introduction of the Maintenix maintenance information system incorporating electronic certification, SMS detailed analysis, as well as the creation, implementation and management of electronic maintenance occurrence reporting systems and numerous support systems.
