

**David Rosen**

Engineering Product Development  
Singapore University of Technology & Design

David Rosen is a Professor in the Engineering Product Development pillar at the Singapore University of Technology & Design, as well as a Professor in the School of Mechanical Engineering at the Georgia Institute of Technology (on leave). He is the Research Director of the Digital Manufacturing and Design Centre at SUTD. His research interests lie at the intersection of design, manufacturing, and computing with specific focus on additive manufacturing, computer-aided design, and design methodology. He is the recipient of the 2013 Solid Freeform Fabrication Symposium, International Freeform and Additive Manufacturing Excellence (FAME) Award and the co-author of a leading textbook in the area.
