

ERGOSS -SARA

Exhibitor: Booth Number 1

SARA by ERGOSS is the culmination of years of developments, optimizations, enhancements and operational feedback from operators, pilots and industry experts that started in 2009. First designed for accident analysis and investigation, SARA (Solutions for Aircraft data Replay and Analysis) has matured into the most advanced Flight Data Analysis tools.

SARA is disruptive with its use of the latest technologies as well as its countless exclusive and innovative features.

The unique information rich environment it delivers to the FDA analysts better assists and accompanies them with their daily tasks.

It relies on the Microsoft cloud, allowing for the fastest processing speeds and "What-If" Analysis, a long recurring operators' request that only SARA delivers upon.

ERGOSS is constantly re-inventing SARA through the exploration and evaluation of emerging technologies and with features from its customers' feedback.
