

Midwest Industrial Supply, Inc.

Exhibitor Booth Number: 23

Midwest's Semi-Permanent Runway technology allows gravel runways to perform like paved surfaces. Our proven and certified environmentally-safe products extend gravel runway surface 7 to 20-years, reduce lifecycle costs 50%, eliminate dust up to 95%, preserve 80-90% of previously lost gravel and fines, maintain as-constructed properties of runway, reduce maintenance costs, protect against FOD damage, increase CBR, and improve braking. Our semi-permanent technology provides longer-lasting performance and requires few applications than all other dust-control and surface stabilization products

The benefits:

- o Performs well at extreme temperatures
- o Can be stored at temperatures down to -50 degrees F
- o Does not mitigate out of the surface
- o No cure time
- o Can be reworked without reapplication
- o Retains surface stabilization effectiveness regardless of season
- o Will not leach or wash-out into surrounding areas
- o EPA-verified safe for people and the environment
- o Complies with Clean Water Act
- o Meets Requirements of the National Pollution Discharge Elimination System
