Safety Management Software Systems

Ideagen Plc is a global supplier of compliance based Information Management software with operations in the UK, United States and the Middle East. Our products, solutions and services are proven to deliver operational efficiency, reduce exposure to risks, drive compliance and protect brands.

We are the leader in providing safety and reporting software to the global aviation industry with more than 300 customers in the sector. Clients include tier one airlines such as Emirates, British Airways, Air Transat and Spirit.

Our solutions combine the disciplines of Quality, Safety and Risk Management with real time Performance Monitoring to ensure you can demonstrate a completely proactive and anticipative approach to operational activities. We have two SMS that are used throughout the industry; Coruson and Q-Pulse.

Coruson, enterprise cloud software that gives you complete control, visibility and real time reporting of every detail and aspect of safety and operational risk in your organisation.
