

Eyes are never quiet

Towards Eye Tracking as a Practical Training Tool

Capt. Mark Cameron, HF Specialist - Emirates
Pat Nolan, GM Aviation - Seeing Machines

IASS 2018
November 12-14
Seattle, USA

After Dublin IASS 2017

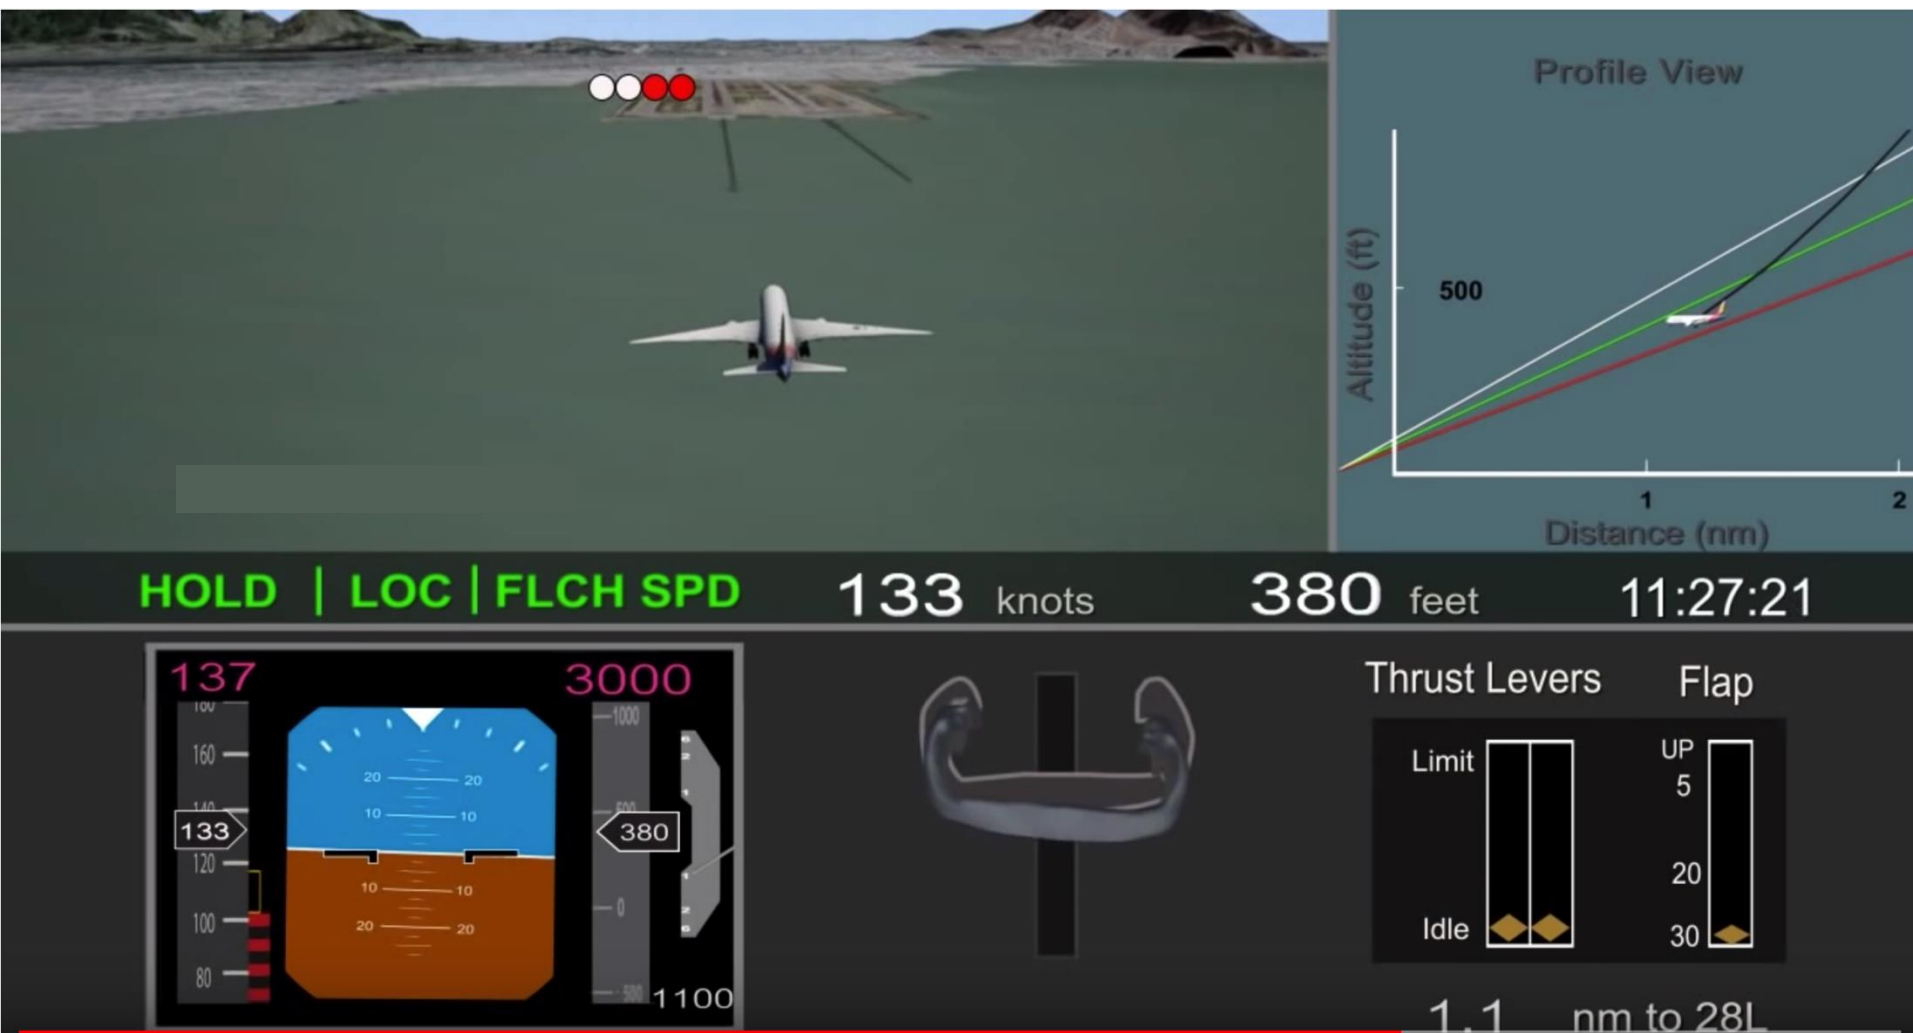

A330 APT to A380 & B737 FFS

At the critical moment...

HL7742 San Francisco 2013

EC-HFP Madrid 2008

G-WNSB Sumburgh 2013

These all happened here first

From Academic Curiosity to Product

- Technology / innovation
- How to move from 'interesting' to 'useful'
- How to make data easy to consume

**COLLABORATION
LEADS TO
GREATER
INNOVATION**

The right data at the right time

A380 FFS Scenario Construction:

Profiles for Proof of Concept

- Visual Circuit CM1 & CM2
- Engine failure V_1 -10kts
- Home base STAR with three sub-events:
 - No Altitude Capture 8000 ft.
 - ATC vector through localizer
 - Wind shift below 200' agl – potential long landing.

MASTER CAUT

□ AUTO RELIGHT IN PROGRESS

.IF NO ENG RELIGHT AFTER 30 S

- ENG 1 MASTER OFF

☐ CONFIRM ENG 1 DAMAGED

☐ APU BLEED : DO NOT USE

- EMER OUTER TK XFR ON

☐ FUEL MAN BALANCING PROC... CONSIDER

☐ CONFIRM ENG 1 NOT DAMAGED

☐ - ENG RELIGHT PROC..... CONSIDER

Data Gathering

Analysis

Approach Analysis

A380 FFS, Results - real time

 seeingmachines

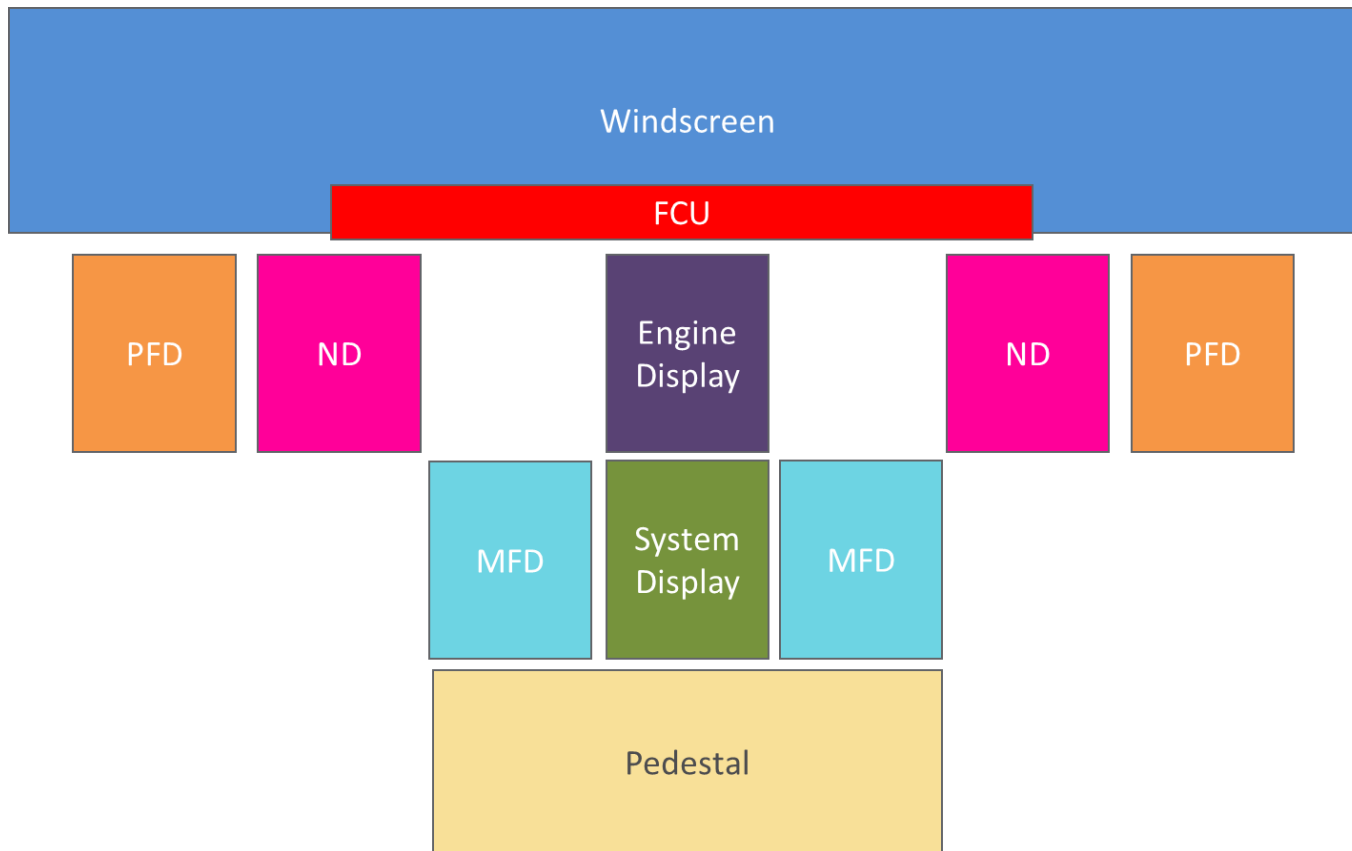

CAPTAIN - PF
Windscreen (Left)
0.2 Seconds

FO - PM
PFD
0.8 Seconds

Results – Regions of Interest

Results – ‘Candybar’ examples

A380 Landing, Focus – end of runway

 seeingmachines

Captain - PF
Windscreen (Left)
9.9 Seconds

- Windscreen
- PFD
- ND
- FCU
- EngineDisplay
- MFD
- SystemDisplay
- Unidentified

A380 Low Visibility Operations

seeingmachines

FO - PM
ND
0.5 Seconds

Captain - PF
PFD
0.5 Seconds

B737 HGS (HUD) Proof of Concept

 seeingmachines

Captain - PF
hud
16.1 Seconds

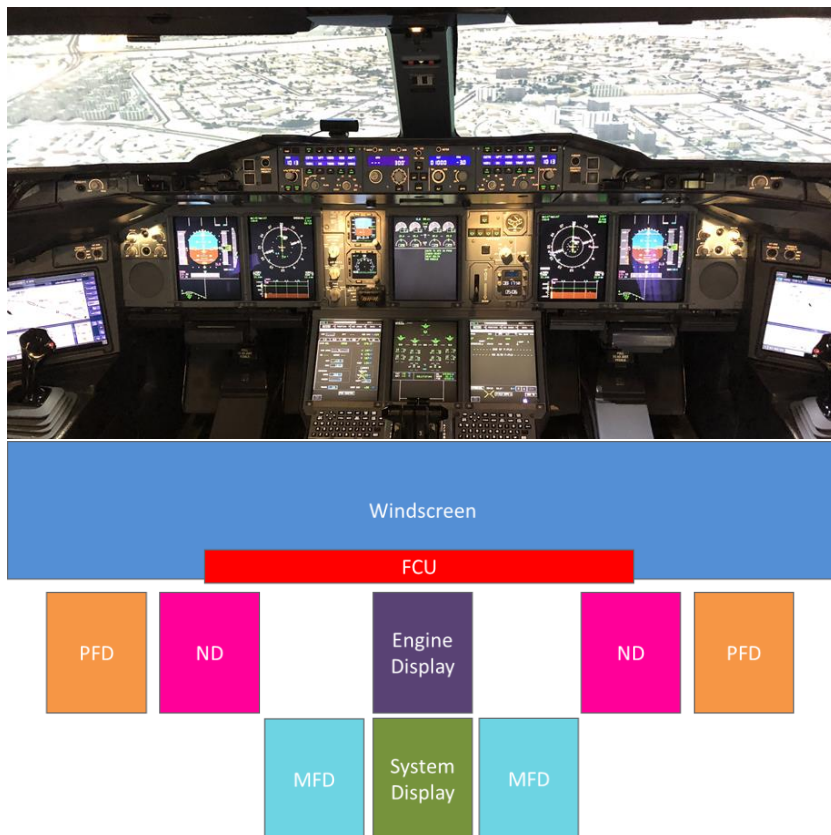

- Windscreen
- PFD
- ND
- FCU
- EngineDisplay
- HUD
- SystemDisplay
- Unidentified

Product Integration

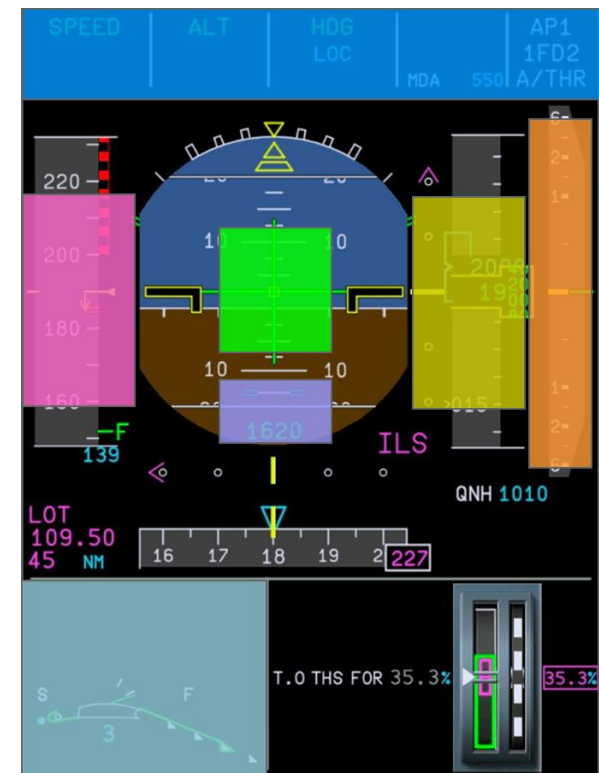

Debriefing Tool, Attention Classifier

Macro (Cockpit)

Micro (PFD or HUD)

Where is this going?

- Corrective training
- SOP Compliance
- Testing of procedural change
- Measuring and defining “Competent”...
- ...therefore getting live ‘gap analysis’ of trainee to “competent”.
- EBT data – trend analysis, making training more efficient.

“Low hanging fruit”

Sequence	Focus / Scenario	Detail	SOP or Technique
1a.	FMA	Mode Change	SOP
1b.	FMA	‘Checked’	SOP
2.	Configuration	Flaps, Gear, SPD BRK	SOP
3a.	Inside / Outside	PF / PM, less than 200’	Technique
3b.	Flare – TDZ or EoR	PF / PM, less than 100’	Technique
4.	Autoland	PM, less than 200’	Technique - PM
5.	Go Around	G/A Sequence	SOP
6.	Take Off	T/O Sequence	SOP
7.	Stabilisation	SOP Criteria, FL, Speed, Config	SOP
8.	Taxi Navigation	PF / PM Onboard Nav System	Technique
9.	Flight Director	FD Fixation	Technique

The future...

Simulator 'hot' debriefing tool

OUT Conf FMA FD V/S SPD RA ALT THR

Thank you!
