## THE POWER OF **CONNECTED**

Honeywell is a leading manufacturer of flight safety systems including weather radar, TCAS, and EGPWS/TAWS. Honeywell's SmartRunway and SmartLanding is a software add-on to the award winning EGPWS, that can increase pilot positional awareness and reduce the risk of runway incursions and runway excursions.  It is certified and operational on over 1,000 commercial airline aircraft operated by Emirates, Alaska Airlines, United Airlines, Ryanair, IndiGo and others. It offers unique callouts to address taxiway landing, wrong surface takeoff and landing, long landing, takeoff flap monitoring, altimeter monitoring, and stable approach monitoring. Come see a demonstration at Booth 20.

Keywords: Runway Safety, RAAS, SmartRunway
