

Capt. Jeffery Ang
Commercial Airline Pilot

I started my flying career at the age of 19 with the Republic of Singapore Air Force after completing my academic study. As a military pilot on the C130 Hercules aircraft, I had flown and participated in numerous Humanitarian Assistance and Disaster Relief Operations, United Nations Peacekeeping Missions, and Air Defence Exercises both locally in Singapore and overseas.

After 12 years of military flying, I joined SIA in 1999 and attained my command on the Boeing 777 wide body airliner in May 2007 and flew that aircraft until Sept 2018. Currently, I am a Commander on the Boeing 787-10, commonly known as the Dreamliner. I am also appointed as Branch Chairman

in the Air Line Pilots Association of Singapore (ALPA-S). With over 32 years of flying experience, I have already acquired approximately 18000 flight hours.
