

Dr. Mark Rice

Scientist

Institute for Infocomm Research, A*STAR

Mark Rice has been a scientist at the Institute for Infocomm Research ('I2R') since 2010. His research crosses areas of human-computer interaction, computer vision and augmented reality, with active interests in exploring advanced technologies in the aviation industry. This has included working on aerospace projects for visual inspection systems, and augmented interfaces for maintenance and wire harness assembly tasks.

Mark holds a PhD in Applied Computing, and has written over 30 publications in journals and international conferences.
