# Upset History – 2001-2019 Commercial Jets

- Steady long-term progress continues to be made in Aviation Safety even though there may be a plateau in performance for the last 5 years
- 2019 by Sector
  - Turboprop slightly behind best results in 2018
  - Commercial Jets – experienced more accidents but fewer fatalities than most of the last 5 years
  - Business Jets – about the same number as 2018
- CFIT – excellent results in last two years
- Challenges ahead
  - Approach and landing – biggest phase of flight area all sectors, still needs improvement
  - Upset / LOC – good progress in last decade, and still more to do
  - Continue to work known solutions and double down on hazard identification for all sectors
