

COVID-19 SAFETY PUNCH LIST— SAFETY ASPECTS OF RE-ESTABLISHING OPERATIONS

Ground Operations

People

- Consider increased risk due to the potential for lack of currency
- Consider skills, experience, knowledge and qualification distribution across shifts
 - Possible prolonged staff loss due to sickness
- Consider risk of airside staff complacency during growing activity levels
- Consider risk of overload of staff due to growing activity levels

Process

- Ensure a process for coordination between flight ops requirements and ground ops for de-storage of ground service equipment
- Consider de-storage and checks of ground equipment

Technical

- Consider possible ground damage to aircraft during prolonged parking
