

Leader in Global Aviation Safety

Ideagen Plc is a global supplier of compliance based Information Management software with operations in the UK, United States and the Middle East. Our products, solutions and services are proven to deliver operational efficiency, reduce exposure to risks, drive compliance and protect brands.

Our solutions combine the disciplines of Quality, Safety and Risk Management with real time Performance Monitoring to ensure you can demonstrate a completely proactive and anticipative approach to operational activities.

We proudly work with:

Ideagen is a market leader and innovator in aviation safety, quality, risk and performance management solutions. Please read the below testimonies from some of our customers regarding our safety management solutions:

"We can capture safety issues more easily and work more proactively as we can detect hazards in advance, which was something we previously could not do. Q-Pulse will improve safety immensely at Brussels Airlines."

Adriaan Charlet, Safety Service Manager, Brussels Airlines

"We are using Coruson for both operational reporting & for occupational health & safety reporting. We have witnessed an increase in the reports being raised, ultimately helps us become a better and safer organisation."

Dennis Hui, General Manager of Quality, The Haeco Group

"Mobile reporting through Coruson will be a significant benefit for our front-line employees. Through this project with Ideagen, we anticipate building on our strong safety culture and believe that mobile reporting will further engage our employees in reporting overall. The simplicity of the Coruson system, ease of access and streamlined reporting, will undoubtedly result in more reports and more safety data."

Captain Palmer, Flyjazz

"In line with AirAsia's vision to be a digital airline, safety performance can be measured accurately using a wealth of data. With Ideagen Coruson, we are delighted to be implementing new, modern software which will make our reporting systems more effective, providing a higher quality of safety assurance."

Captain Ling Liong Tien, AirAsia
